

# Solutions Outside the Box

We are a software engineering & innovation company founded in 2015 that transforms organizations with innovative and custom based software solutions. We focus only on adding value doing software and data engineering for industrial, commercial and the government sector.

## Mobile development

Web & Apps development. We have **experienced and skilled software engineers** for the development process for both "native and hybrid" mobile solutions, **as well as DevOps and UX/UI profiles** which completes the "software engineering combo". We love to work on React.JS, React Native, Angular, Node.JS, Android, iOS and AWS technologies

## Data engineering

End-to-end custom software solutions that leads our clients to **access, accommodate, model and exploit data in order to improve their business and operational strategies**. We aim on anomalies detection, pattern and correlations identification plus visualization. We help businesses to become data-driven organizations transforming data into client's profits.

## Machine learning processes

Would you like to be ahead? We build **interpretable data models and algorithms to predict time series, classify, segment, and automate plus optimize your decision making processes**. We create machine learning models that allows us to predict particular events in the future based on data from the past.

### Did you know that...?

- ROSS is a company based in Cordoba, Argentina with representation in Barcelona, Spain. We currently are +35 crew members, including social science professionals, human resources, psychology and political science specialists, agile coaches and marketing design graduates; plus 25 software engineers. Our leaders have seriously learned the software engineering business due to their +25 years of experience working within multinational companies.
- According to the Global Skills Index, Argentina is the global leader in technological skills and software engineering. We have special and strong cultural similarities with both the US and Europe. We are first in Latin America in English skills and among the top 15 in the world, according to Education First. Argentina's friendly time zone make communication simple and agile. Argentina's current exchange rate makes us highly cost competitive.
